

# "Anti-Hydro"<sup>®</sup> Is The Solution To Your Concrete & Mortar Problems!

Add "Anti-Hydro"<sup>®</sup>  
to your Concrete,  
Mortar, Tile Grout &  
Stucco and the  
results will be  
out of this world!

"Anti-Hydro"<sup>®</sup>  
Proven Effective  
Waterproofing  
Since 1904

# Here Is Why You Want To Use "Anti-Hydro<sup>®</sup>"

## **Waterproofing**

Complete waterproofing protection for masonry, stucco, precast concrete, cast-in-place structural concrete, swimming pools, tanks, basements, chimneys, cement pargeeting, patching, protecting embedded steel from corrosion due to weather & underground utility work

## **Cold Weather Protection**

Keeps concrete & mortar from freezing, sets quickly

## **High Strength**

Dramatically increases strength

## **Hardening & Densifying**

Over 30% harder and denser

## **Water Vapor Control**

Reduces Vapor Transmission up to 85%!

## **Improved Bonding**

Bonds new concrete - the bond is stronger than the concrete itself

## **Increase Durability**

It will last years longer!

## **Protect Against Abrasion**

Drag dumpsters on it, forklifts on it, chains and weights on it - it will last far longer

## **Reduce Shrinkage**

Far fewer cracks

**This is the BIG reason:  
"Anti-Hydro<sup>®</sup>" increases the  
chemical reaction (hydration) of  
portland cement and water by  
25% to 30%. That makes  
concrete, mortar, stucco, and tile  
grout waterproof!**

## **Increase Contractor's Productivity**

Which means you do it once and it is done right!

## **Workability**

Makes concrete, stucco and mortar more workable

## **Protect Against Salts**

## **Improve Curing**

## **Quick Set**

## **Reduce Construction Time**

## **Cost Savings**

Quality results, ease of use, one-product many benefits

## **Increase Contractor's Productivity**

## **Quality Results**

## **Ease of Application... and more!**

# Here Is What You Use “Anti-Hydro<sup>®</sup>” For:

## **Concrete**

Complete waterproofing protection and it makes it harder, reduces vapor transmission & cracks, and is non-dusting.

## **Masonry**

Waterproof, reduce cracks, harder, more durable, lasts far longer

## **Tanks**

Waterproof... permanently

## **Stucco**

Waterproof, reduce cracks, harden & make more durable

## **Ceramic Tile Grout**

Hard, non-friable, durable

## **Structural Concrete**

Harder, stronger, longer lasting

## **Swimming Pools**

Permanent waterproofing

## **Walls**

Why do your waterproofing after the job is done?

## **Floors**

Less vapor transmission, more durable, harder, more wear resistant

## **Basements**

Do them right the first time - waterproof and reduces dampness 85%

## **Chimneys**

Reduces cracks & leaks, reduce gas transmissions up to 85%

## **Toppings**

Harder, stronger, waterproof, better bonding

## **Concrete Repairs**

Patches, pargets and toppings bond to existing concrete better than existing concrete holds onto itself! Harder & more durable.

## **Underground Utility Work**

Quick, durable, and inexpensive patching

## **Precast Concrete Products**

Reduce rejects, break molds faster, reduce cracks, protect against freeze-thaw, waterproof

Increases durability

Mortar is harder, waterproof, less shrinkage, better bonding, more durable.

Waterproofs concrete.

On tiles for walls and flooring for increased durability, impermeability, harder, and easier to maintain

# Here Is How To Use "Anti-Hydro®":

For underground utilities -  
"Anti-Hydro®" patches them,  
makes them waterproof.

Reduces cracking due to  
shrinkage

Approved for many uses by  
U.S. Government, U.S. Corp.  
of Engineers, State and local  
Governments across the U.S.  
& by independent  
authorities.

Your precast products will  
last for centuries!

Easy enough for anyone to  
use - for residential use, it's  
a must.

"Anti-Hydro®" is packaged in  
containers sized from quarts  
to tankers. Mix it in your  
concrete, mortar, tile grout or  
stucco as per instructions. Our  
Technical Support Department  
is always ready to help!

"Anti-Hydro®" changes  
a lot of things for commercial  
construction and contractors! It  
makes customers satisfied  
because it means a job gets  
done once, and done right the  
first time.

"Anti-Hydro®" usage  
includes major  
industrial and  
commercial projects.  
For example: office  
buildings, warehouses,  
walls and floors,  
government buildings,  
schools, etc.
